

Experiment No:1

Aim of the experiment: To create a table in SQL

Program: create table bcaiii(sl_no number(2),regd_no varchar(10),Name varchar(20),phone_number number(10), blood_group varchar(5));

Output:

| Name | Null? | Type |
|--------------|-------|--------------|
| ----- | | |
| SL_NO | | NUMBER(2) |
| REGD_NO | | VARCHAR2(10) |
| NAME | | VARCHAR2(20) |
| PHONE_NUMBER | | NUMBER(10) |
| BLOOD_GROUP | | VARCHAR2(5) |

```
SQL> create table bcaiii(sl_no number(2),regd_no varchar(10),Name varchar(20),phone_number number(10), blood_group varchar(5));
Table created.

SQL> desc bcaiii;
Name                               Null?    Type
-----
SL_NO                               NUMBER(2)
REGD_NO                             VARCHAR2(10)
NAME                                VARCHAR2(20)
PHONE_NUMBER                         NUMBER(10)
BLOOD_GROUP                          VARCHAR2(5)

SQL>
```
